OVERALL VERDICT	PASS

SUMMARY: The inspection series predominantly showed full compliance with the standards across all observed periods where cardboard boxes were present on the conveyor belt, with no defects detected in Events 1-3. Event 4, while passing, introduced some uncertainty due to initial absence of inspectable elements and focus on a single box. Overall, the majority of the inspection findings indicate adherence to the specified rules.

PROJECTED IMPROVEMENTS

- Enhance inspection protocols to handle scenarios where initial periods lack inspectable elements (conveyor belt/boxes) to reduce uncertainty.
- Ensure a representative sample size of boxes is inspected in each event to confidently assess full compliance.
- Refine scoring system to better reflect nuanced situations (e.g., Event 4's Score=50 seems inconsistent with a PASS verdict; consider a more granular scoring or additional verdict categories for borderline cases)

POSITIVE HIGHLIGHTS

- Consistent defect-free performance across Events 1-3, demonstrating strong adherence to quality standards.
- Effective observer reporting across all events, facilitating clear understanding of compliance status.
- Successful inspection of individual boxes against all specified criteria (crumpling, tearing, dents, creases, open flaps/boxes) when present.

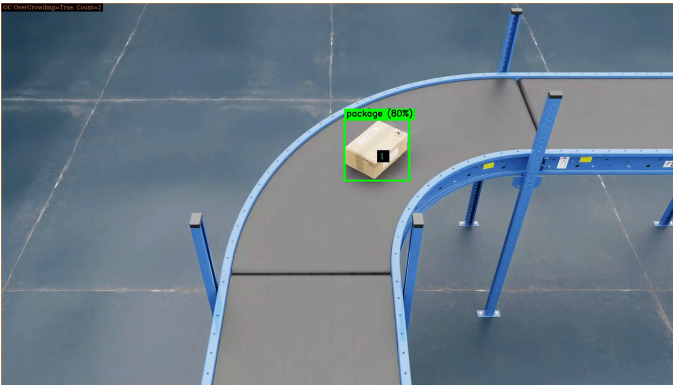

SOP AUDIT CONTEXT

Inspect the cardboard boxes on the conveyor belt for: 1) Crumpling, 2) Tearing, 3) Dents, 4) Creases, 5) Open flaps/boxes.

DETAILED FINDINGS & VISUAL EVIDENCE

Finding 1: Inspection Finding

TIMESTAMP 10:41:23
SOP SECTION Packaging & Shipping Standards
COMPLIANCE SCORE 100%

AUDIT ANALYSIS:

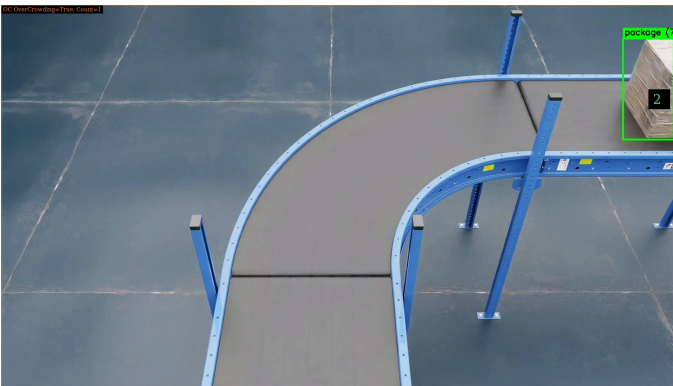

CHRONOLOGICAL AUDIT TIMELINE:

[0.0s - 5.0s]: The cardboard box remains visually undamaged with no observable defects such as crumpling, tearing, dents, creases, or open flaps.

[4.0s - 6.3s]: No visible anomalies detected. The single white cardboard box on the conveyor belt shows no signs of crumpling, tearing, dents, creases, or open flaps.

Finding 2: Inspection Finding

TIMESTAMP 10:41:42
SOP SECTION Packaging & Shipping Standards
COMPLIANCE SCORE 100%

AUDIT ANALYSIS:

CHRONOLOGICAL AUDIT TIMELINE:

[0.0s - 5.0s]: No visible cardboard boxes on the conveyor belt to inspect for the specified conditions.

[4.0s - 9.0s]: The inspected cardboard box shows no visible signs of crumpling, tearing, dents, creases, or open flaps; it remains intact and fully closed throughout the observed motion.

[8.0s - 13.0s]: No instances of crumpling, tearing, dents, creases, or open flaps were observed on the cardboard boxes during the video. All boxes maintained structural integrity and appeared uniformly sealed throughout the sequence.

[12.0s - 17.0s]: Both boxes maintain their rectangular shape with closed flaps, showing no crumpling, tearing, dents, or creases.

[16.0s - 19.867s]: No anomalies detected.

Finding 3: Inspection Finding

TIMESTAMP 10:41:57
SOP SECTION Packaging & Shipping Standards
COMPLIANCE SCORE **100%**

AUDIT ANALYSIS:

CHRONOLOGICAL AUDIT TIMELINE:

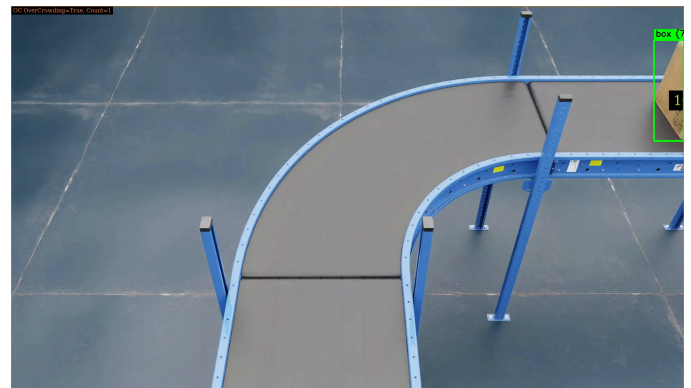

[0.0s - 5.0s]: None of the specified conditions (crumpling, tearing, dents, creases, open flaps/boxes) can be assessed as there are no cardboard boxes visible on the conveyor belt in the provided frames.

[4.0s - 9.0s]: The cardboard box shows no visible signs of crumpling, tearing, dents, creases, or open flaps as it moves along the conveyor belt.

[8.0s - 11.4s]: No visible damage (crumpling, tearing, dents, creases) or open flaps observed on the cardboard box during its movement along the conveyor belt.

Finding 4: Inspection Finding

TIMESTAMP 10:42:14
SOP SECTION Packaging & Shipping Standards
COMPLIANCE SCORE **50%**

AUDIT ANALYSIS:

CHRONOLOGICAL AUDIT TIMELINE:

[0.0s - 5.0s]: No instances of crumpling, tearing, dents, creases, or open flaps were observed, as no cardboard boxes or conveyor belt were present in the video. The scene consisted of a static blue metal structure and a stationary black rectangular object on a flat gray surface.

[4.0s - 9.0s]: No visible anomalies detected for the inspected cardboard box.

[8.0s - 13.0s]: No observable issues detected; the cardboard box remains intact with no signs of crumpling, tearing, dents, creases, or open flaps during its movement.

[12.0s - 17.0s]: The cardboard box remains intact with no visible crumpling, tearing, dents, creases, or open flaps.
