OVERALL VERDICT	FAIL

SUMMARY: The inspection series failed due to insufficient data across all events, with no event providing assessable information on PPE compliance and forklift proximity. All events lacked necessary details or had no individuals present for evaluation. Consequently, compliance against the specified standards could not be determined.

PROJECTED IMPROVEMENTS

- Ensure observer reports are complete, descriptive, and specifically address PPE (high-visibility vests, safety helmets) and forklift proximity.
- Schedule inspections during periods of guaranteed personnel presence to enable PPE compliance assessment.
- Conduct a preliminary check to confirm the scene's activity level before initiating the inspection to avoid empty scenes.

POSITIVE HIGHLIGHTS

- No safety violations were observed in terms of PPE or forklift proximity due to the absence of individuals in all observed scenes.
- The consistent lack of assessable data across events indicates a potential systematic issue that can be addressed through improved inspection planning.
- No incidents involving forklifts or lack of PPE were recorded during the observations, suggesting a safe environment when empty.

SOP AUDIT CONTEXT

Inspect all individuals in the scene for Personal Protective Equipment (PPE) compliance. Specifically describe: 1) Presence of high-visibility safety vests (e.g. orange/yellow vests). 2) Presence of safety helmets. 3) Proximity to the moving forklift.
